1.1.2 List of Employability, Entrepreneurship and Skill Enhancement Courses

Program Name	Course Code	Course Title	Course Outcomes
MBA	MBA918	Managing Innovation and Entrepreneurship	• develop understanding of key concepts of entrepreneurship and its application in business opportunities
			• learn creative process and design thinking for innovation
			• plan business models and strategies for entrepreneurial venture
			• develop insight and learn application of customer value proposition, market research, financing, and IPR for entrepreneurship
EMBA	E-204	Entrepreneurship	• Apply new ideas, methods and ways of thinking.
			• Engage with a range of stakeholders to deliver creative and sustainable solutions to specific problems.
			• Communicate effectively both orally and in writing. Work effectively with colleagues with diverse skills, experiences and be able to critically reflect on own practice.
B.Design	SDS 402	Design Management & Entrepreneurship	• The student at the completion of the course will be able to:
			• Understand aspects of the business of design.
			• Gauge what makes a design profitable. Understand strategies of production and scaling.
			• Recognize types of intellectual property and its application and importance in design.
MBA	MBA-401/MMS534	Project management and entrepreneurship development	1. To make them understand the concepts of Project Management for planning to execution of projects.
			2. To make them understand the feasibility analysis in Project Management and network analysis tools for cost and time estimation.
			3. To enable them to comprehend the fundamentals of Contract Administration, Costing and Budgeting.
			4. Make them capable to analyze, apply and appreciate contemporary project management tools and methodologies in Indian context.
B.Com	BCH-405	Entrepreneurship and small business management	The objective of this course is to understand the terminologies associated with the field of Entrepreneurship along with their relevance.

Ph.D	P.hd	Research methodology	To understand the concept and process of Business research in business environment, to know the use of tools and techniques for exploratory, conclusive and causal research, to understand the concept of measurement in empirical systems and its validity and reliability, to use statistical techniques for analysis of research data and to realize the applications of Business research. The course will also introduce students to the safeguards against errors in both data collection and data analysis and reporting.
IMBA	IMBA-405/ IMBA 406	Entrepreneurship	
EMBA	E-202/ E-103	Business communication	The objective of this paper is to develop and enhance the skill of candidates in such a manner so that they can communicate effectively through either written or oral source. The focus will be on the practical session with emphasis on skill development of the participants.
EMBA	E-412/ E-331	Financial modeling and business forecasting	This course aims to equip the students with the fundamental concepts of financial modeling and business forecasting. Upon the completion of the course, the students should be able to evaluate business problems and determine suitable analytical methods, compare different analytics techniques, analyse and validate the results and gain meaning out of large data. This course also introduces the basic financial modelling.
EMBA	E-414/ E-228	HR analytics	this course is to provide a detailed understanding of various qualitative and quantitative measures (metrics) of human resource activities and processes in organizations, research, and track and compile these measures in to data sets, and use statistical tools for analyzing the data. The course will also familiarize participants in the use of tools to analyze, interpret, and generate reports/ dashboards, for better human resource management decisions.
M.Sc Chemistry (Integrated)	CYC-101:	Inorg. Chem. I: Atomic Structure & Chemical Bonding	Different types of chemical bonds including ionic bond, covalent bond, metallic bond and weak chemical forces
M.Sc Chemistry (Integrated)	CYL-101	Titrimetric Analysis Lab	To prepare solutions of different molarity/normality of titrants To carry out titrimetric analysis

M.Sc Chemistry (Integrated)	CYC-102	Phys. Chem. I: States of Matter & Ionic Equilibrium	Kinetic molecular model of a gas, Maxwell distribution and its use in evaluating molecular velocities, Behaviour of real gases, van der Waals equation of state and critical state of gases
M.Sc Chemistry (Integrated)	CYL-102	Physiochemical Lab	To measure viscosity and surface tension of solutions using experimental techniques
M.Sc Chemistry (Integrated)	CYG-101	<i>Generic Chem. :</i> Atomic Structure, Bonding, General Organic Chemistry & Aliphatic Hydrocarbons	Fundamentals of organic chemistry including (i) physical effects and electronic displacements, (ii) structure, shape and reactivity of organic molecules and (iii) strengths of organic acids and bases
M.Sc Chemistry (Integrated)	GCL-101	Inorganic and Organic Chemical Analysis Lab	To perform volumetric analysis using acid-base titrations and oxidation-reduction titrimetric experiments
M.Sc Chemistry (Integrated)	EES-110	Environmental Science	Environmental science and its significance as well as relevance in context of human life
M.Sc Chemistry (Integrated)	CYC-151	<i>Org. Chem. I: Basics and Hydrocarbons</i>	Various electronic effects that influence acidic or basic properties of molecules.
M.Sc Chemistry (Integrated)	CYL-151	Organic Compounds Purification Lab	To separate the mixture of organic compounds using chromatography
M.Sc Chemistry (Integrated)	CYC-152	Chemical Thermodynamics and its Applications	The laws of thermodynamics Thermodynamic equilibrium and spontaneous reactions
M.Sc Chemistry (Integrated)	CYL-152	Thermochemistry Lab	To experimentally determine the various thermodynamic and kinetic parameters of different chemical reactions
M.Sc Chemistry (Integrated)	CYG-151	Chemical Energetics, Equilibria & Functional Group Organic Chemistry-I	Important concepts of chemical equilibrium and ionic equilibrium Methods of preparation and chemical properties of aromatic hydrocarbons, alkyl halides, aryl halides, alcohols, phenols, ethers, aldehydes and ketones
M.Sc Chemistry (Integrated)	ENG-151	English	Reading, Writing and Speaking in English
M.Sc Chemistry (Integrated)	CYC-201	Inorg. Chem. IIs - and <i>p</i> -Block Elements	Synthesis, structural aspects and applications of inorganic polymers including silicones, siloxanes, borazines, silicates and phosphazenes, and polysulphates
M.Sc Chemistry (Integrated)	CYL-201	Quantitative Inorganic Analysis and Synthesis Lab	To carry out quantitative estimations using iodo / iodimetric titrations
M.Sc Chemistry (Integrated)	CYC-202	Phys. Chem. III Phase Equilibrium and Chemical Kinetics	Concept of phases and phase diagram of one component system and the application of phase diagram
M.Sc Chemistry (Integrated)	CYL-202	Chemical Kinetics Lab	Apply different method to monitor and understand kinetics of chemical reactions

M.Sc Chemistry (Integrated)	CYC-203	Org. Chem. II Oxygen Containing Functional Groups	Relative reactivity of alkyl, aryl, and vinyl halides towards nucleophilic substitution reactions. Preparation and reactions of carboxylic compounds, acid chlorides, anhydrides, esters and amides
M.Sc Chemistry (Integrated)	CYL-203	Basic organic synthesis lab	To prepare and synthesize organic compounds by performing reactions (such as acetylation, benzylation, oxidation of ethanol/ isopropanol (iodoform reaction), bromination, nitration, selective reduction, hydrolysis, aldol condensation and benzil-benzilic acid rearrangement
M.Sc Chemistry (Integrated)	CYS-201	Skill Enhancement Course: Fuel Chemistry	Petroleum, petrochemical industry, different types of petroleum products and their applications
M.Sc Chemistry (Integrated)	CYG-201	Generic Chem.: Chemistry of <i>s</i> - and <i>p</i> -Block Elements, States of Matter and Chemical Kinetics	Chemistry of <i>s</i> and <i>p</i> block elements and their compounds including hydrides of nitrogen, oxoacids of P, S and Cl and halides and oxohalides
M.Sc Chemistry (Integrated)	GCL-201	Basic Physical and Inorganic Chemistry Lab	To perform semi-micro qualitative analysis for identifying cations and anions
M.Sc Chemistry (Integrated)	CYC-251	<i>Inorg. Chem. III</i> : Coordination Chemistry	IUPAC nomenclature, isomerism, stereochemistry and various theories of coordination compounds
M.Sc Chemistry (Integrated)	CYL-251	Inorganic Preparation, Separation and Gravimetric Analysis Lab	To carry out gravimetric analysis for quantitative estimation of different metals such as nickel, copper, iron and aluminium.
M.Sc Chemistry (Integrated)	CYC-252	<i>Org. Chem. III</i> : Heterocyclic Chemistry	Classification, nomenclature, and named synthesis of various heterocyclic compounds.
M.Sc Chemistry (Integrated)	CYL-252	Organic Qualitative Analysis Lab	To identify the functional groups (such as nitro, amine and amide) in the organic compounds by performing the chemical tests.
M.Sc Chemistry (Integrated)	CYL-253	Electrochemistry Lab	To measure the conductance of the electrolytes using electroanalytical methods namely conductometry and potentiometry methods
M.Sc Chemistry (Integrated)	CYC-253	<i>Phys. Chem. IV</i> : Electrochemistry	Different thermodynamic parameters for chemical reactions, comprehend the redox processes in electrochemical systems
M.Sc Chemistry (Integrated)	CYS-255	<i>Skill Enhancement Course</i> : Chemistry of Cosmetics and Perfumes	Preparation and uses of (i) hair dye, (ii) hair spray, (iii) shampoo, (iv) suntan lotions, (v) face powder, (vi) lipsticks, (vii) talcum powder, (viii) nail enamel, (ix) creams, (x) antiperspirants and artificial flavours
M.Sc Chemistry (Integrated)	CYG-252	Organometallics, Bioinorganic Chemistry, Polynuclear Hydrocarbons and UV, IR Spectroscopy	Preparation, structure, properties and bonding of mononuclear and polynuclear metal carbonyls of 3d series

M.Sc Chemistry (Integrated)	CYC-301	Org. Chem. IV: Biomolecules	Classification and mechanism of enzymes Food metabolism, process of conversion of food into energy. Structure, synthesis and medicinal importance of some pharmaceutical compounds
M.Sc Chemistry (Integrated)	CYL-301	Biochemistry Lab	To study the action of salivary amylase on starch, and the effect of temperature on such action
M.Sc Chemistry (Integrated)	CYC-302	Phys. Chem. V: Quantum Chemistry & Spectroscopy	Schrodinger equation for a particle in a box and quantum chemical description
M.Sc Chemistry (Integrated)	CYL-302	Spectroscopic Analysis Lab	Record and interpret UV-Vis Spectra of common chemicals
M.Sc Chemistry (Integrated)	CYD-302	Polymer Chemistry	Criteria for synthetic polymer formation and classification of polymerization processes, Relationships between functionality
M.Sc Chemistry (Integrated)	DCL-302	Polymer Chemistry Lab	To prepare and synthesize simple polymers such as nylon 66/6, polyester, urea-formaldehyde resin, novalac resin/resold resin and poly(methylacrylate)
M.Sc Chemistry (Integrated)	CYD-352	Research Methodology for Chemistry	Methods of scientific research and writing scientific papers, writing ethics, and avoiding plagiarism
M.Sc Chemistry (Integrated)	CYC-351	<i>Inorg. Chem. IV: Organometallic Chemistry</i>	Organometallic compounds, their definition, their classification, 18 electron rule, EAN rule, hapticity of ligands
M.Sc Chemistry (Integrated)	CYL-351	Inorganic Synthesis and Qualitative Analysis Lab	To perform qualitative semimicro-analysis of mixtures containing inorganic anions and cations
M.Sc Chemistry (Integrated)	CYC-352	<i>Org. Chem. V: Carbohydrates, Dyes, Polymers and Basics of Organic Spectroscopy</i>	How to draw structures of carbohydrates in different projections and their inter-conversion
M.Sc Chemistry (Integrated)	CYL-352	Organic Synthesis and Qualitative Analysis Lab	To perform qualitative analysis of organic compounds containing one or two functional groups
M.Sc Chemistry (Integrated)	CYD-303	<i>Discipline Specific Elective: Inorganic Materials of Industrial Importance</i>	Alloys and their classification of alloys, types of alloys, specific properties of elements in alloys, manufacturing of steel
M.Sc Chemistry (Integrated)	DCL-303	Industrial Inorganic Materials Lab	To analyse the inorganic materials or compounds (such as fertilizers, cement, alloys, pigments) of industrial importance
M.Sc Chemistry (Integrated)	CYD-304	Discipline Specific Elective: Novel Inorganic Solids	Nanomaterials, their classification, Au and Ag nanostructures, carbon nanotubes and inorganic nanowires, bio-inorganic nanomaterials, DNA and nanomaterials, and bionano composites.
M.Sc Chemistry (Integrated)	DCL-304	Materials Chemistry Lab	To carry out the synthesis of (i) hydrogel by co-precipitation method (ii) silver and gold metal nanoparticles
M.Sc Chemistry (Integrated)	DCL-310:	UG Dissertation	To carry out research (experimental or computational work) and write the scientific report and article.

M.Sc Chemistry (Integrated)	CYC-401	Structure and Reactivity of Organic Molecules	Conformations and reactivities of cyclohexane and its derivatives Thermodynamics and kinetics aspects of a chemical reactions
M.Sc Chemistry (Integrated)	CYC-402	Thermodynamics and Interfaces	Understand the concept of classical and statistical thermodynamics, Maxwell Boltzmann, Bose-Einstein, Fermi-Dirac statistics and different partition functions
M.Sc Chemistry (Integrated)	CYC-403	Solid State Chemistry	Applications of XRD in determine crystal structure and phase of a solid material
M.Sc Chemistry (Integrated)	CYC-404	Structure and Properties of Metal Complexes	Metal-ligand bonding and molecular orbital theory Electronic spectra of coordination compound
M.Sc Chemistry (Integrated)	CYC-405	Instrumental Methods of Analysis-I	Principles and instrumentation of various separation techniques such as liquid chromatography, gas chromatography and electrophoresis
M.Sc Chemistry (Integrated)	CYL-406	Inorganic Chemistry Lab-	To perform the experiments in the laboratory for carrying out gravimetric analysis and complexometric titrations to determine the metal content
M.Sc Chemistry (Integrated)	CYL-407	Organic chemistry lab-1	To perform the experiments in the laboratory for carrying out organic chemical transformations such as Diels-Alder reaction, oxidation reactions and reduction
M.Sc Chemistry (Integrated)	CYL-408	Physical chem Lab-1	To carry out the electrochemical analysis and its application in understanding the thermodynamics of the given systems.
M.Sc Chemistry (Integrated)	CYC-451	<i>Pericyclic and Organic Photochemistry</i>	Classifications of pericyclic reactions, molecular orbital symmetry and frontier molecular orbital concepts
M.Sc Chemistry (Integrated)	CYC-452	<i>Reagents and Reactions in Organic Chemistry</i>	Various reagents in organic reactions and functional group transformations
M.Sc Chemistry (Integrated)	CYC-453	<i>Kinetics and Photochemistry</i>	Chemical kinetics of simple and complex reactions Analysis techniques for fast reactions Photochemical and photo physical processes
M.Sc Chemistry (Integrated)	CYC-454	<i>Inorganic Biochemistry and Reaction Mechanism</i>	Reaction mechanism of transition metal complexes Various aspects of inorganic biochemistry
M.Sc Chemistry (Integrated)	CYC-455	<i>Instrumental Methods of Analysis-I</i>	Principles, instrumentation and applications of vibrational, electron spin resonance (ESR), nuclear magnetic resonance (NMR) and Mossbauer spectroscopy
M.Sc Chemistry (Integrated)	CYL-456	Inorganic chem lab -II	To perform the experiments in the laboratory for synthesizing inorganic coordination compounds (metal complexes with ligands) and interpret their electronic spectra
M.Sc Chemistry (Integrated)	CYL-457	Organic chemistry lab-II	To perform the experiments in the laboratory for synthesizing specific and important organic compounds

M.Sc Chemistry (Integrated)	CYL-458	Physical chem lab-II	To design and execute experiments to study the kinetics of various reactions and the factors effecting the rate of reactions.
M.Sc Chemistry (Integrated)	CME502	Green Chemistry	Alternate routes for the green synthesis of some organic compounds
M.Sc Chemistry (Integrated)	COE-502	Organic Structure Determination	Fundamentals and applications of UV-Vis, infrared (IR) and 1D NMR spectroscopic and mass spectroscopic techniques in the structure elucidation of organic compounds
M.Sc Chemistry (Integrated)	CYL-501	Inorganic chem lab -III	To perform the experiments in the laboratory for carrying out qualitative and/or quantitative analysis of metals using spectrophotometric methods, flame photometry and atomic absorption spectroscopy
M.Sc Chemistry (Integrated)	CYL-502	Organic chemistry lab-III	To interpret and analyse the ^1H and ^{13}C NMR spectra to elucidate the structures of organic compounds
M.Sc Chemistry (Integrated)	CYL-503	Physical chem lab-III	To design and execute experiments to study the surface chemistry of surfactant, micelles and colloidal systems using different techniques
M.Sc Chemistry (Integrated)	COE-506	Organic Synthesis Lab	To perform experiments in the laboratory to carry out separation of mixture of organic compounds using liquid-liquid extraction
M.Sc Chemistry (Integrated)	COE-507	Medicinal Chemistry	Drug targets including proteins, enzymes and receptors, their structures and functions
M.Sc Chemistry (Integrated)	CYC-551	Thesis/Dissertation	To carry out research (experimental or computational) work and writing the report, article and thesis
