MSc Physics

| Q. No. | Question | Option A | Option B | Option C | Option D |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | Multiplication of $(\cos 2 \pi / 3+i$ $\sin 2 \pi / 3),(\cos \pi / 2+\mathrm{i} \sin \pi / 2)$ and $(\cos \pi / 3+\mathrm{i} \sin \pi / 3)$ is | 1 | i | -i | -1 |
| 2 | Which of the following is incorrect? | costacois | sindesin | $\cos =\cos k$ | isin=sind |
| 3 | For the differential $\mathrm{A}(\mathrm{x}, \mathrm{y}) \mathrm{dx}+$ 6xydy to be exact, the function A(x,y) should be | 3 x | $3 x^{2}$ | $3 y$ | $3 y^{2}$ |
| 4 | The velocity vector of an object is given by $8 \mathrm{i}-3 \mathrm{j} \mathrm{m} / \mathrm{s}$. What is the speed of the object? | $11 \mathrm{~m} / \mathrm{s}$ | $5 \mathrm{~m} / \mathrm{s}$ | $\sqrt{ } 55 \mathrm{~m} / \mathrm{s}$ | $\sqrt{73 \mathrm{~m} / \mathrm{s}}$ |
| 5 | For what value of x will the two vectors $\mathrm{a}=\mathrm{i}+2 \mathrm{j}+2 \mathrm{k}$ and $\mathrm{b}=2 \mathrm{i}$ $+3 j+x k$ be perpendicular to each other? | 2 | -2 | 4 | -4 |
| 6 | If $a=b+\lambda c$ then which of following is always true for the vectors? | $\overrightarrow{a x C} \vec{b} \overrightarrow{X C}$ | $\overrightarrow{a x C} \vec{C}=\vec{b} \vec{C}$ | $\vec{a} \vec{c} \vec{b} \vec{c}$ | $\vec{a} \vec{c}=\vec{b} \vec{c}$ |
| 7 | A scalar field is given by . Its gradient $\quad$ will be: $\varphi=x y^{2} z^{3}$ | $6 y z^{2}$ | $x y^{2} z^{3 \vec{\imath}}+x y^{2} z^{3} \vec{\jmath}+x y^{2} z^{3} \vec{k}$ | $y^{2} z^{3 \vec{\imath}}+2 x y z^{3 \vec{\jmath}}+3 x y^{2} z^{2} \vec{k}$ | None of the above |
| 8 | $\begin{aligned} & \text { Laplacian } \\ & \text { scalar field } \\ & \text { by }\end{aligned} \nabla^{2} \equiv \frac{\partial^{2}}{\partial x^{2}}+\frac{\partial^{2}}{\partial y^{2}}$ is $\frac{\partial_{j}^{2}}{\partial z^{2}}$ of a | 1 | $x+y+z$ | $\frac{1}{x}+\frac{1}{y}+\frac{1}{z}$ | 0 |
| 9 | Which of the following is not true? | $\nabla(\phi+\psi)=\nabla \phi+\nabla \psi$ | $\nabla(\phi)=\phi \nabla \psi+\phi \nabla \phi$ | $\nabla \cdot(\not)=\phi \cdot \vec{a}+\vec{a} \cdot \nabla \phi$ | None of the above |
| 10 | Which of the following functions can not have the Fourier series expansion? | $\sin \mathrm{x} ;(-\pi / 4 \leq \mathrm{x} \leq \pi / 4]$ | $\cos \mathrm{x} ;(-\pi / 4 \leq \mathrm{x} \leq \pi / 4]$ | $\tan \mathrm{x} ;(-\pi / 4 \leq \mathrm{x} \leq \pi / 4]$ | $\cot \mathrm{x} ;(-\pi / 4 \leq \mathrm{x} \leq \pi / 4]$ |
| 11 | The maximum line integral of a | Divergence of a vector field | Divergence of a scalar field | Curl of a vector field | Curl of a scalar fields |

| 12 | Which of the following is correct for the differential equation | It's a Third order first degree differential equation | It's a Third order second degree differential equation. | It's a second order third degree differential equation | It's a first order first degree differential equation |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 13 | The essential singular point of the Simple Harmonic equation $y^{\prime \prime}+\omega^{2} y=0$ is at: | 0 | 1 | $\infty$ | None of the above |
| 14 | The complex function $\mathrm{z}=2 \mathrm{y}+\mathrm{ix}$ is differentiable at | $y=2 \mathrm{x}$ | $2 \mathrm{y}=\mathrm{x}$ | $\mathrm{x}=0$ | None of the above |
| 15 | The branch point of the function $\left(z^{2}-1\right)^{1 / 2}$ is | $\mathrm{z}=0$ | $\mathrm{z}=\mathrm{i}$ | $z=-i$ | $\mathrm{z}=1$ |
| 16 | The ratio of intensities of two waves is $25: 9$. The interference of two waves would produce maximum and minimum intensities ratio | 2 | 3 | 5 | 8 |
| 17 | Two simple harmonic oscillators having same amplitudes and same frequencies but phase difference of $\pi / 2$ are superimposed perpendicular to each other. What will be the shape of the motion? | straight line | circle | ellipse | None of the above |
| 18 | Two particles each having mass m are attached with the identical springs having force constants k are attached as shown in figure. What will be the larger normal mode frequency for this |  | k/m | 2k/m | 3k/m |
| 19 | The Laplace correction in the speed of sound in air is the consideration of the process to be | isothermal | isobaric | adiabatic | None of the above |

| 20 | The phase difference between the incident and reflected waves from an open end is | 0 | $\pi / 2$ | $\pi$ | the wave does not reflect from open end |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 21 | Statistical thermodynamics provide an additional interpretation of concept of | entropy | thermodynamics probability | sum of thermodynamics probability for macrostate | energy of system |
| 22 | If the system is degenerate then their degeneracy is more than one and if the system is nondegenerate then their degeneracy is | 1 | 2 | 3 | 4 |
| 23 | In which statistics number of particles are Unlimited? | Fermi Dirac Statistics | Bose Einstein Statistics | MB \& BE Statistics | None of the above |
| 24 | Which conditions are required for Fermi Dirac Statistic | $\mathrm{n}_{\mathrm{j}} \geq \mathrm{g}_{\mathrm{j}}$ | $\mathrm{n}_{\mathrm{j}} \leq \mathrm{g}_{\mathrm{j}}$ | $\mathrm{n}_{\mathrm{j}} \neq \mathrm{g}_{\mathrm{j}}$ | None of the above |
| 25 | Relation between Entropy(S) and Thermodynamic probability $(\Omega)$ | $\mathrm{S}=\mathrm{K}_{\mathrm{B}}$ | $\mathrm{S}=\mathrm{K}_{\mathrm{B}} \log (\Omega)$ | $\mathrm{S}=\boldsymbol{\Omega}$ | $\mathrm{S}=\mathrm{K}_{\mathrm{B}}$ |
| 26 | thermodynamic probability for Maxwell Boltzmann statistics is | 1836 | 1336 | $3.37 \times 10^{5}$ | $3.37 \times 10^{2}$ |
| 27 | The Maxwell Boltzmann Statistical Law is given by the | $\frac{1}{e^{\frac{\varepsilon}{k T}}}$ | $\frac{1}{e^{1+\frac{E}{k T}}}$ | $\frac{1}{e^{\alpha+n \frac{E}{k T}}}$ | $\frac{1}{e^{\alpha+\frac{E}{k T}}}$ |
| 28 | Phase space is a | 3 dimensional space | 4 dimensional space | 5 dimensional space | 6 dimensional space |
| 29 | The vibrational partition function equation is given by | $Q_{v i b}=\left(1+e^{-\frac{h v}{k T}}\right)^{-1}$ | $Q_{v i b}=\left(1-e^{-\frac{h v}{k T}}\right)^{-1}$ | $Q_{v i b}=\left(1+e^{\frac{h v}{k T}}\right)^{-1}$ | $Q_{v i b}=\left(1-e^{\frac{h v}{k T}}\right)^{-1}$ |
| 30 | How many different ways can two distinguishable balls can be placed in two boxes | 2 | 4 | 6 | 8 |
| 31 | the possible states of a mechanical system that has an exactly specified total energy is represented by | canonical ensemble | grand canonical ensemble | Microcanonical ensemble | partition function |

| 32 | let $\Omega(E)$ be the number of microstates accessible to the | $\omega(E)=\frac{\Omega(E)}{\delta \mathrm{E}}$ | $\omega(E)=\Omega(E) \delta E$ | $\omega(E)=\frac{\Omega(E) \delta E}{2}$ | $\omega(E)=\frac{\Omega(E)}{\mathrm{E}}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 33 | the number of states of a system with $f$ degrees of freedom and whose energy lies between E and $\mathrm{E}+\delta \mathrm{E}$ approximately varies with energy E of the system as | $\mathrm{E}^{3 \mathrm{~N}}$ | $E^{f}$ | $E^{N / 2}$ | $\mathrm{E}^{\mathrm{f} / 2}$ |
| 34 | An interaction between the systems without a change in the external parameter is known as pure | Thermal interaction | Mechanical interaction | General interaction | Mixed interaction |
| 35 | The correct expression for the number of accessible states in the energy interval E and $\mathrm{E}+\delta \mathrm{E}$ for an ideal monoatomic gas of N molecules enclosed in volume V | $B V^{N} E^{3 N}$ | $B V^{N / 2} E^{3 N / 2}$ | $\mathrm{BVE}^{3 \mathrm{~N} / 2}$ | $B V^{N} E^{3 N / 2}$ |
| 36 | Two distinguishable molecules are distributed in three equal sized compartments. The number of possible macrostates and microstates are | $(6,6)$ | $(6,9)$ | $(3,6)$ | $(9,6)$ |
| 37 | A jet plane starts from rest with an acceleration of $3 \mathrm{~m} / \mathrm{s}^{2}$ and makes a run for 35 s before taking off. What is the minimum length of the runway? | 105 m | 1837.5 m | 2451 m | 1204 m |
| 38 | The Probability of having at least one tail in five throws with a coin is | 31/32 | 1/32 | 1/5 | 1 |

| 39 | Two springs in horizontal spring mass systems have spring constants in the ratio 2:3. By what ratio should they be extended from their mean positions so that they have the same value of maximum speed? The masses of blocks are the same in both cases. | 3/2 | $\sqrt{ } 3 / \sqrt{2}$ | 9/4 | 4/9 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 40 | Suppose you place a sphere of mass ' $m$ ' and radius ' $r$ ' inside a smooth, heavy hemispherical bowl of radius of 37 r placed on a horizontal table. If the sphere is given a small displacement, what is its period of oscillation | $2 \pi \sqrt{ }(\mathrm{~m} / 37 \mathrm{rg})$ | $2 \pi \sqrt{ }(\mathrm{~m} / \mathrm{rg})$ | $12 \pi \sqrt{ }(\mathrm{r} / \mathrm{g})$ | $2 \pi \sqrt{ }(\mathrm{r} / \mathrm{g})$ |
| 41 | Which of the following is the condition for the three-force theorem in mechanics | The force system should be in equilibrium only | The force systems should be non-coplanar | The system should be coplanar, parallel | The force system should be in equilibrium, coplanar, concurrent, or parallel |
| 42 | What is a free-body diagram | It's a sketch of a moving body that shows internal forces of the body and reaction forces | It's a sketch of an undisturbed body that shows external forces of the body | It's a sketch of an isolated body that shows external forces of the body and reaction forces | It's a sketch of a body in motion that shows bending forces of the body |
| 43 | The moment is the cross product of which of the following two vectors/scalars | Force and Radius scalars | Radius and Force scalars | Force and Radius vectors | Radius and Force vectors |
| 44 | Two of the things of the composite materials are to be known so that their mass moment of inertia can be varied. Which of the following is one of them | Weight of the centre of gravity | Weight of the body | Location of the centroid of gravity | Location of the centre of mass |

| 45 | The maximum height of a projectile on a horizontal plane, is | $u^{2} \sin ^{2} \alpha / 2 \mathrm{~g}$ | $\mathrm{u}^{2} \cos ^{2} \alpha / 2 \mathrm{~g}$ | $u^{2} \sin ^{2} \alpha / \mathrm{g}$ | $u^{2} \cos ^{2} \alpha / \mathrm{g}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 46 | Non-coplanar non-concurrent forces are those forces which | Meet at one point, but their lines of action do not lie on the same plane | Do not meet at one point and their lines of action do not lie on the same plane | Do not meet at one point but their lines of action lie on the same plane | None of the above |
| 47 | The velocity ratio of a differential wheel and axle with ' D ' as the diameter of effort wheel and d 1 and d 2 as the diameters of larger and smaller axles respectively, is | $\mathrm{D} /\left(\mathrm{d}_{1}+\mathrm{d}_{2}\right)$ | $\mathrm{D} /\left(\mathrm{d}_{1}-\mathrm{d}_{2}\right)$ | $2 \mathrm{D} /\left(\mathrm{d}_{1}+\mathrm{d}_{2}\right)$ | $2 \mathrm{D} /\left(\mathrm{d}_{1}-\mathrm{d}_{2}\right)$ |
| 48 | A particle moves along a straight line such that distance ( x ) traversed in ' t ' seconds is given by $\mathrm{x}=\mathrm{t}^{2}(\mathrm{t}-4)$, the acceleration of the particle will be given by the equation | $6 t^{2}-8 t$ | $3 t^{2}+2 t$ | $6 \mathrm{t}-8$ | $6 t-4$ |
| 49 | Which of the following statement is correct | The periodic time of a particle moving with simple harmonic motion is the time taken by a particle for one complete oscillation | The periodic time of a particle moving with simple harmonic motion is directly proportional to its angular velocity | The velocity of the particle moving with simple harmonic motion is zero at the mean position | The acceleration of the particle moving with simple harmonic motion is maximum at the mean position |
| 50 | If ' P ' is the force acting on the body, ' m ' is the mass of the body and ' $a$ ' is the acceleration of the body, then according to Newton's second law of motion, | $\mathrm{P}+\mathrm{m} \cdot \mathrm{a}=0$ | $\mathrm{P}-\mathrm{m} . \mathrm{a}=0$ | $\mathrm{P} \times \mathrm{m} . \mathrm{a}=0$ | $\mathrm{P} / \mathrm{m} . \mathrm{a}=0$ |
| 51 | The ratio of limiting friction and normal reaction is known as | Coefficient of friction | Angle of friction | Angle of repose | Sliding friction |

| 52 | The velocity of a particle (v) moving with simple harmonic motion, at any instant is given by (where, $\mathrm{r}=$ Amplitude of motion, and $y=$ Displacement of the particle from mean position.) | $\omega . \sqrt{ }\left(\mathrm{y}^{2}-\mathrm{r}^{2}\right)$ | $\omega . \sqrt{ }\left(\mathrm{r}^{2}-\mathrm{y}^{2}\right)$ | $\omega^{2} \cdot \sqrt{ }\left(\mathrm{y}^{2}-\mathrm{r}^{2}\right)$ | $\omega^{2} \cdot \sqrt{ }\left(\mathrm{r}^{2}-\mathrm{y}^{2}\right)$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 53 | When the spring of a watch is wound, it will possess | Strain energy | Kinetic energy | Heat energy | Electrical energy |
| 54 | The moment of inertia of a thin disc of mass ' $m$ ' and radius ' $r$ ', about an axis through its center of gravity and perpendicular to the plane of the disc is | $\mathrm{mr}^{2} / 2$ | $\mathrm{mr}^{2} / 4$ | $\mathrm{mr}^{2} / 6$ | $\mathrm{mr}^{2} / 8$ |
| 55 | For a simple cubic lattice, inter planar spacing is | $d=\frac{a}{\sqrt{h^{2}+k^{2}+l^{2}}}$ | $d=\frac{1}{\sqrt{h^{2}+k^{2}+l^{2}}}$ | $d=\frac{a}{\sqrt{h^{2}+k^{2}}}$ | $d=\frac{a}{\sqrt{k^{2}+l^{2}}}$ |
| 56 | The co-ordination number in diamond is | 4 | 6 | 8 | 12 |
| 57 | A beam of X-rays of wavelength $0.72 \AA$ is diffracted from KCl crystal of density $2000 \mathrm{~kg} / \mathrm{m}^{3}$. Assuming the crystal to be face centred cubic, the interpanalar spacing for (200) plane is | 3.14 Å | 3.41 Å | 3.31 Å | 3.33 Å |
| 58 | Which direct lattice is the reciprocal of its own reciprocal lattice. | fcc | bcc | SCC | None of the above |
| 59 | Name the type of diode whose characteristics is shown in figure below |  le | ideal diode | p-n junction diode | None of the above |

| 60 | The atoms in a solid are held together by | internuclear forces | gravitational forces | interatomic forces | weak forces |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 61 | The dispersion relation relates between | $\omega$ and K | $\omega$ and c | K and c | None of the above |
| 62 | The time between the successive collisions is termed as | mean time | relaxation time | time period | time constant |
| 63 | The band theory of solids, the band which is completely empty at 0 K is known as | conduction band | forbidden band | valence band | hyper band |
| 64 | Meissner effect is the phenomenon due to which the magnetic lines of force through a superconductor are | attracted | come close to each other | repelled away | allowed to pass through a superconductor |
| 65 | The phase difference between the input and output voltages in a common emitter arrangement is | $180^{\wedge} 0$ | 90^0 | 270^0 | $0^{\wedge} 0$ |
| 66 | A half wave rectifier has an input voltage of 240 V r.m.s. If the step down transformer has a turns ratio of $8: 1$, what is the peak load voltage. Ignore diode drop | 27.5 V | 86.5 V | 30 V | 42.5 V |
| 67 | The purpose of a coupling capacitor in a transistor amplifier is to | increase the output impedance of a transistor | protect the transistor | pass a.c. and block d.c. | provide biasing |
| 68 | Which expression mention the De Morgan's theorem |  | $\overline{A+B}=\bar{A} \bar{B}$ | $A B$ |  |
| 69 | What is the addition of the binary number 101001+ 010011=? | 10100 | 111100 | 000111 | 101110 |

|  | A classification of integrated <br> circuits with complexities of 30 <br> to 300 equivalent gates on a <br> single chip is known as | VLSI |  | LSI | SSI |
| :--- | :--- | :--- | :--- | :--- | :--- |

| 79 | Three charged cylindrical sheets are present in three spaces with $\sigma$ $=5$ at $\mathrm{R}=2 \mathrm{~m}, \sigma=-2$ at $\mathrm{R}=4 \mathrm{~m}$ and $\sigma=-3$ at $R=5 \mathrm{~m}$. Find the flux density at $\mathrm{R}=6 \mathrm{~m}$. | 17/6 | -17/6 | 13/6 | -13/6 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 80 | The skin depth of a conductor with attenuation constant of 7 neper $/ \mathrm{m}$ is | 14 | 49 | 7 | 1/7 |
| 81 | The motion of a wave packet is similar to | photon | classical particle | quantum particle | waves |
| 82 | in an ideal gas the molecules have | k.e. only | p.e. only | both kinetic and potential energy | None of the above |
| 83 | the value of universal gas constant is | 8.314 J / K mole Kelvin | 8314 j / Mole k | [ 8.314 joule/ mole k | None of the above |
| 84 | root mean square velocity of gas molecules in a vessel can be | $\sqrt{\frac{3 m}{K T}}$ | $\sqrt{\frac{3 K T}{M}}$ | $\sqrt{\frac{3 T}{M K}}$ | $\frac{K T}{3 M}$ |
| 85 | in an isothermal process the internal energy of the system | increase | decrease | remain constant | zero |
| 86 | first law of thermodynamics when applied to an adiabatic process becomes | $\mathrm{W}=\mathrm{du}$ | $\mathrm{W}=\mathrm{Q}$ | $Q=d u$ | w $=-\mathrm{du}$ |
| 87 | The neutrino and antineutrino are distinguished by | charge | rest mass | helicity | parity of ground state wavefunction |
| 88 | The accelerator used to accelerate electrons is | cyclotron | Van de Graff generator | betatron | tandem Van de Graff generator |
| 89 | and | R, Y | $\gamma \quad 1 / \mathrm{R}, 1 /$ | $\gamma \quad \mathrm{R}, 1 /$ | $\gamma$ 1/R, |
| 90 | If temperature of sink is decreases efficiency of carnot engine is | remains constant | decreases | increases | None of the above |
| 91 | A nucleus emits a $\alpha$-particle, followed by two $\beta$-particles. The final nucleus will be | An isotone of the original one | An isotope of the original one | An isobar of the original one. | None of the above |

| 92 | Nuclear force is | Spin independent | Both charge and spin independent | Spin dependent but charge independent | Charge dependent |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 93 | The Surface-energy term appears in semi-empirical mass formula as a result of | Repulsion between the charged particles, protons, in the nucleus | Reduction of total binding energy due to nucleons on the surface of the nucleus | Excess number of neutrons in the nucleus | intrinsic nucleonic spin |
| 94 | The fact that the binding energy per nucleon is roughly a constant over most of the range of stable nuclei is a consequence of the fact that the nuclear force is | Short range | Long range | Weak | Strong |
| 95 | A particle moves in such a way that its kinetic energy just equals its rest energy. The velocity of this particle is | 0.866c | c/4 | c | 0.707c |
| 96 | Which one of the following statements is correct? | The mass of the nucleus must be less than the sum of the masses of the constituent neutrons and protons. | The mass of the nucleus must be equal to the sum of the masses of the constituent neutrons and protons | The mass of the nucleus must be greater than the sum of the masses of the constituent neutrons and protons. | The mass of the nucleus must be equal to only the masses of the constituent neutrons |
| 97 | The nucleus which is an isotope of Cl-37 and also an isobar of Ar 18 has mass number A and atomic number Z given by | $\mathrm{A}=35, \mathrm{Z}=18$ | $A=37, Z=17$ | $\mathrm{A}=39, \mathrm{Z}=17$ | $\mathrm{A}=37, \mathrm{Z}=19$ |
| 98 | Complete the sequence of magic numbers as, $2,8,20,50, \ldots \ldots, 126$, 184. | 60 | 72 | 82 | 100 |
| 99 | The volume of a nucleus in an atom is proportional to the | Mass number | Proton number | Neutron number | Electron number |
| 100 | A conservation law that is not universal but applies only to certain kinds of interactions is conservation of | lepton number | spin | charge | strangeness |
